

Northwind Robotics

Annual Report — Fiscal 2024

Northwind Robotics designs autonomous warehouse robots for mid-market logistics operators. In fiscal 2024 the company expanded into two new regions and shipped its third-generation picking arm, Vega-3.

Management's strategy centres on recurring software revenue: every robot now ships with a subscription fleet-management platform, lifting gross margin from 41% to 48% year over year.

Key risks include supplier concentration for actuators and intensifying competition from incumbent material-handling vendors.

Quarterly Revenue

Quarter	Revenue (\$M)
Q1	82
Q2	95
Q3	110
Q4	138

Revenue by Segment

Segment	Revenue (\$M)
Hardware	289
Software subscriptions	96
Services	40
